SCOPE COTTON

27 June 1968

MEMORANDUM FOR: See Distribution

SUBJECT: Proper Storage and Classification of Classified Materials

25X1

1. It may be desirable to store certain maintenance manuals and other printed matter with the A-12 aircraft, and should the decision be made to store such material, it is imperative that the printed matter first be properly classified according to content. In no case will TOP SECRET, [redacted] or other codeword material be stored with any of the unclassified printed matter associated with the A-12 mothballing. If it is desirable to isolate such material and store it for possible future use of the A-12, this material should be stored at Headquarters and appropriately controlled.

2. In the last year, there has been considerable material prepared on the OXCART Program, some of which has not been appropriately controlled and/or classified. Request that precaution be taken to insure that all material be properly classified and that which is controlled codeword material be accounted for and proper destruct forms be prepared where applicable.
